Patient Demographics

Key Insights

1

Executive Overview

15,634

Encounters

₹108.5M

Total Revenue

Ambulatory care drives a 19-year revenue climb, spiking sharply in 2015 before settling near ₹2-3M/yr.

2

Hospital Operations

44,543

Encounters

24.4%

Insured Share

Ambulatory visits dominate volume; patient out-of-pocket cost overtakes insurance payouts after 2012.

3

Provider Performance

5,056

Active Providers

₹45.8K

Avg. Rev / Provider

Revenue concentrates among a few standout providers, led by VA Boston, Saint Anne's and Cambridge.

4

Clinical Analytics

531K

Observations

204

Unique Conditions

Stress and social isolation rank among the most common conditions — as frequent as chronic disease.

5

Patient Demographics

49.1 yrs

Average Age

62%

Female Patients

An aging, majority-female population; healthcare expense climbs sharply for patients over 45.

Key Derivations

A high-volume ambulatory network serves an aging, majority-female patient base — but insurance covers only ~23% of cost, leaving heavy self-pay exposure. Conditions extend beyond the clinical: stress and social isolation surface as often as chronic disease.

THE OPPORTUNITY

Target coverage-expansion outreach at the 45+ segment where expense peaks, and screen for social determinants of health alongside routine chronic-disease management to close both financial and non-clinical care gaps.
